PROFILE

Final-year Computer Science Engineering student graduating in 2027, interested in creating intuitive, visually engaging digital experiences. Developed design concepts for music discovery and student productivity. Focused on visual hierarchy, typography, user flows, interface consistency, and prototyping. Seeking entry-level opportunities in UI/UX and product design.

DESIGN SKILLS

UX

User flows, wireframing, information architecture, design thinking, usability fundamentals

UI

Visual hierarchy, typography, color, spacing, layout, responsive design fundamentals

TOOLS

Figma, FigJam, Canva

ADDITIONAL

Generative AI concepts, prompt engineering, Python, Streamlit

EDUCATION

Sri Vasavi Engineering College

B.Tech · Computer Science Engineering
2023–2027 | CGPA: 7.2/10

Aditya Junior College

Intermediate · MPC
2021–2023 | 77%

Sasi EM School, Nallajerla

SSC · 10th class
2021 | 100%

SELECTED PRODUCT DESIGN PROJECTS

01 Spotify AI+

MUSIC DISCOVERY

AI-Enhanced Music Discovery Experience

- Explored AI-assisted personalization for music discovery and listening experiences.
- Developed interface concepts emphasizing typography, visual hierarchy, color, layout, and consistent design.
- Considered how personalized recommendations could make music exploration more intuitive and engaging.

02 AI Life Planner

STUDENT PRODUCTIVITY

A Planning Experience for Student Life

- Designed a student-focused concept for organizing study activities, daily tasks, and personal routines.
- Explored study planning, habit tracking, task management, and progress-monitoring features.
- Focused on clear information hierarchy and consistent layouts across productivity features.

CERTIFICATION

SAP Certified – Back-End Developer – ABAP Cloud
